Versioning a cut in Premiere is four manual steps.

Every single time.

Project: Brand_Film_2026

new

STEP 1

Duplicate the sequence

Project: Brand_Film_2026

renaming

Edit_v01

Edit_v02

Edit_v03

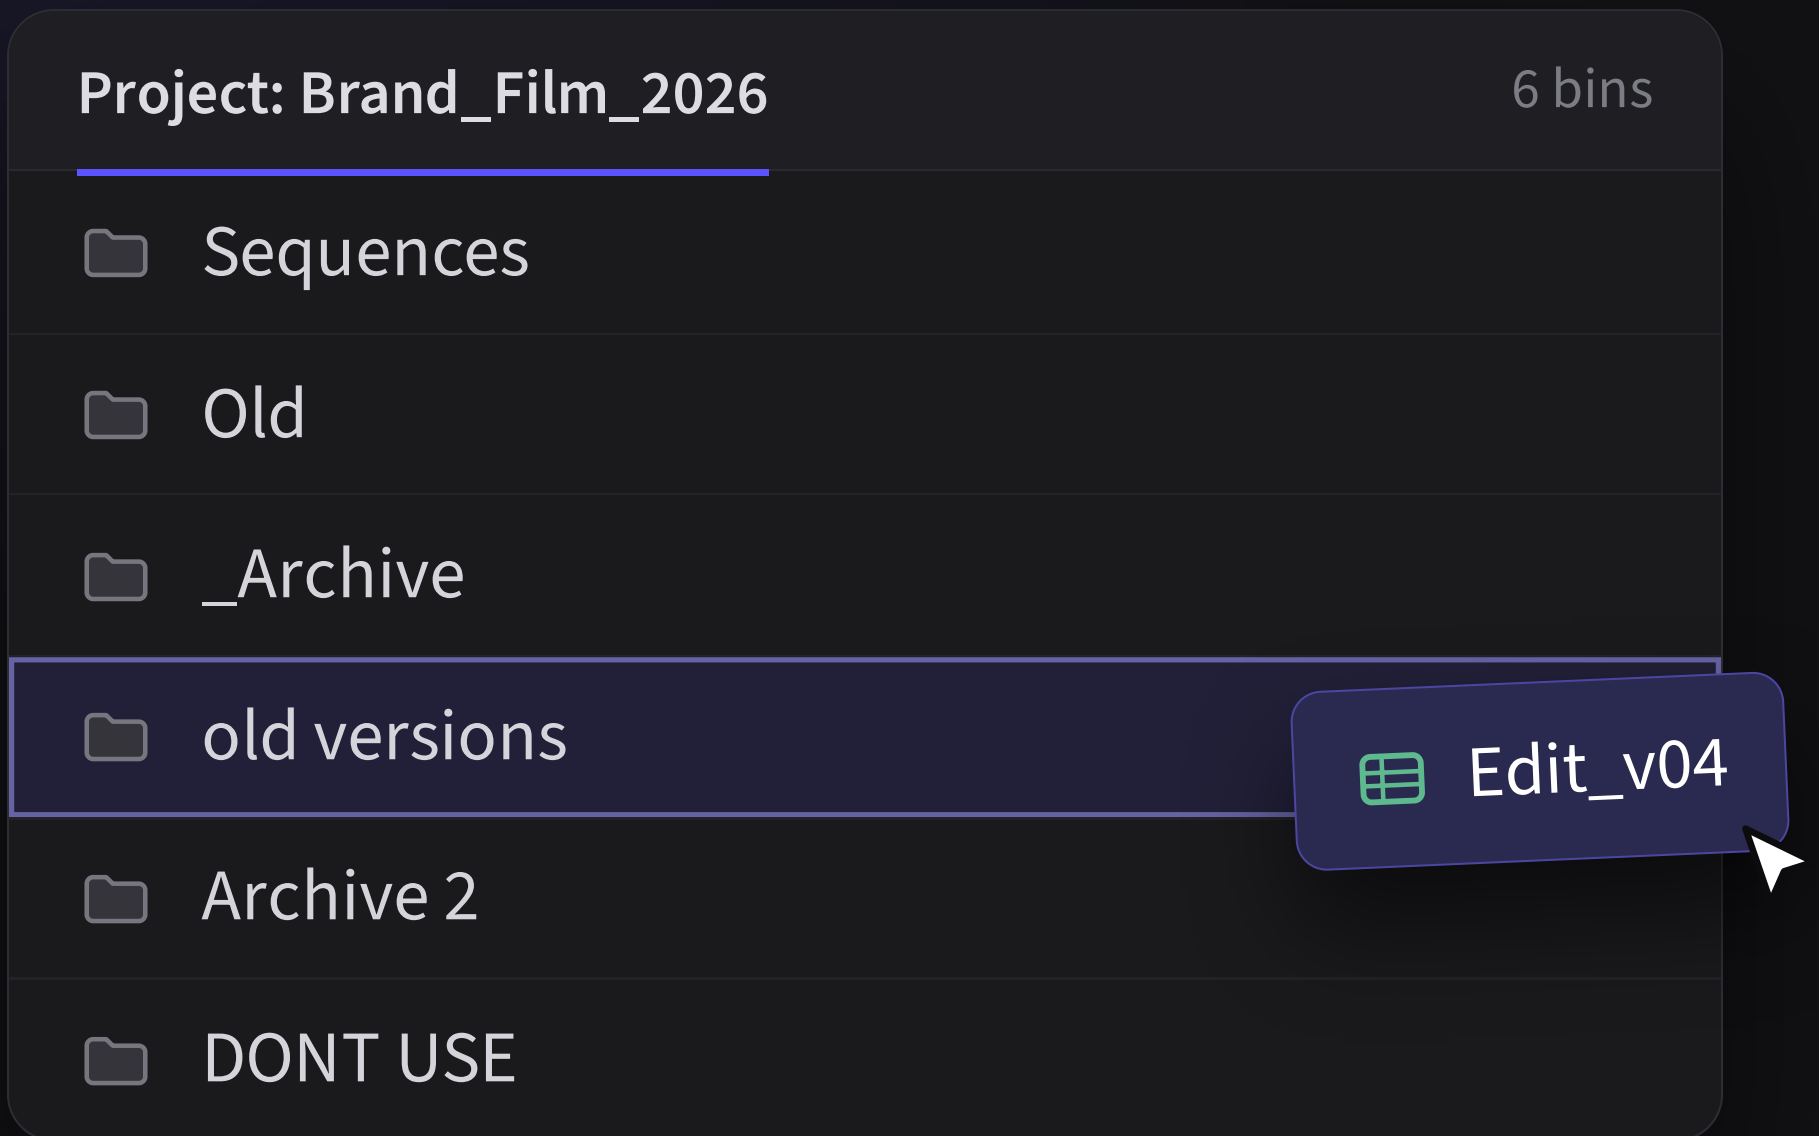

Edit_v4

v4 or v04?

STEP 2

Rename it

and hope you type it the same way you did last time

STEP 3

Drag it into whichever bin you decided was the sensible one

📄 Edit_v03_amends

📄 Edit_v03b

📄 Edit_v03_OLD

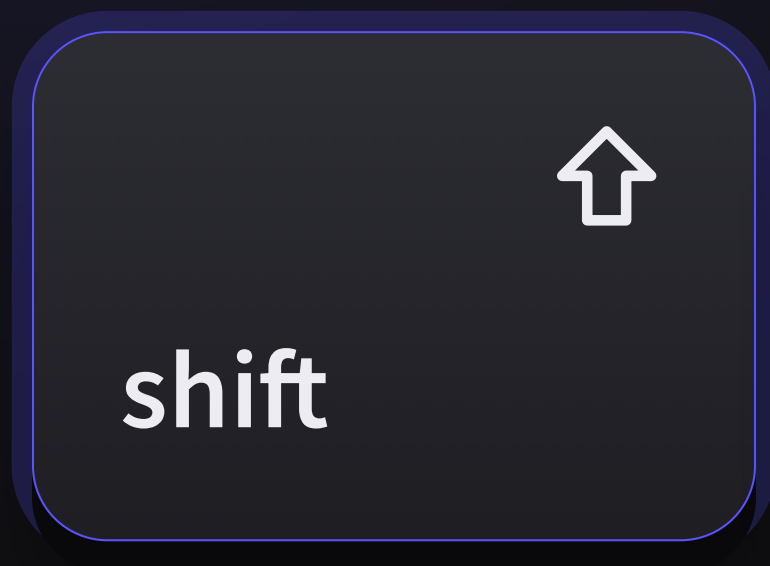

STEP 4

Go looking for the old one again three days later

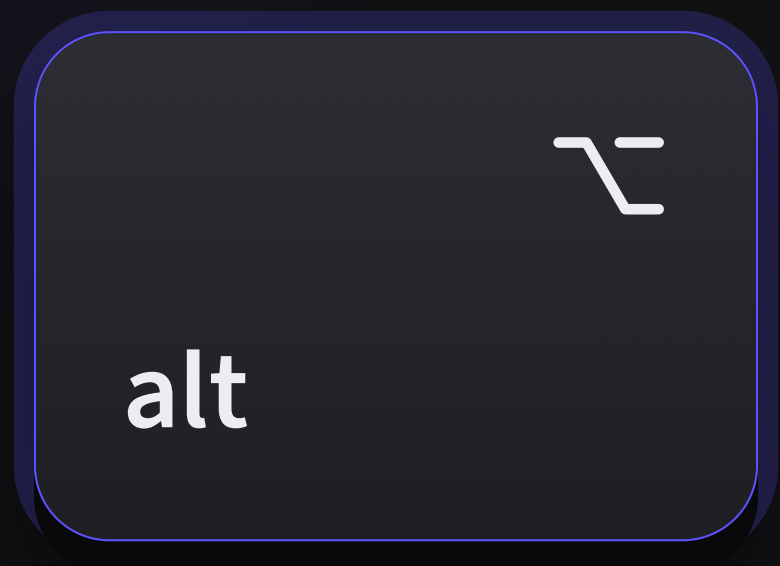

VersionUp does all four in one click.

Hover, and it shows you the new name before you commit.

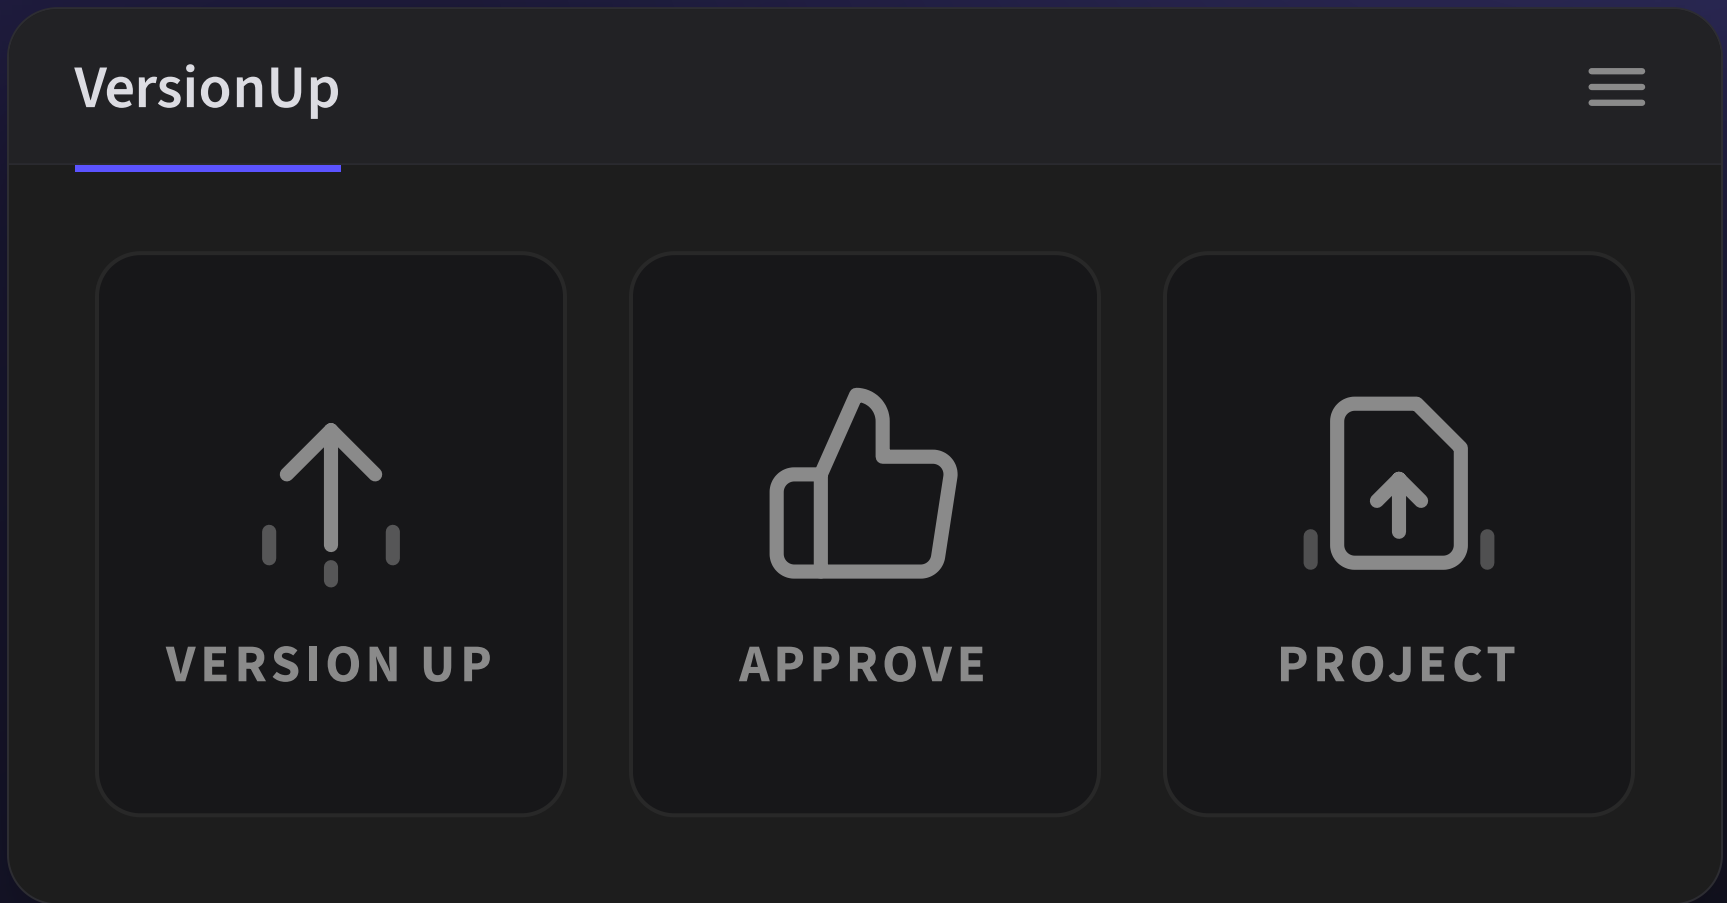

next major version

an alternative, not
a version

Everything else is on a modifier key.

And every version is listed in the panel.

Three buttons.
On purpose.
