

Version, or alternative?

Getting this wrong is why your bins are a mess.

A version replaces the one before it.

The old one is history. You keep it, but you're not going back.

L I V E

A L S O L I V E

Edit_2026_v04

Edit_2026_ALT_v04

An alternative sits beside it.

Both are live. You genuinely might choose either one.

Project: Brand_Film_2026

which one?

 Edit_v04

?

 Edit_v04b

?

 Edit_v04_new

?

 Edit_v04_USE_THIS

?

Most of us only have one word for both.

So they all end up as v04, and nobody knows which is which.

Versions go up.

A straight line. Newest wins.

L I V E

A L S O L I V E

Edit_2026_v03

Alternatives go sideways.

Same point in time. Two roads.

**When the brief changes,
the major number moves.**

Nobody has to ask what happened.

UP

the next version

SIDEWAYS

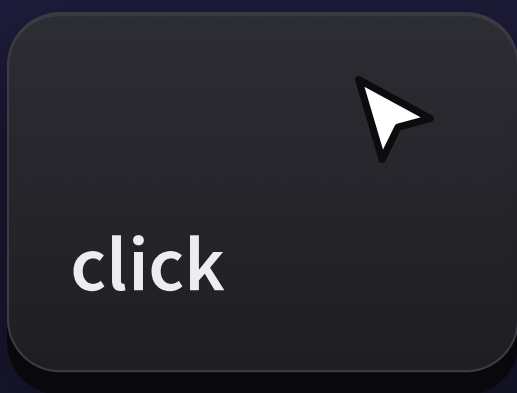

an alternative

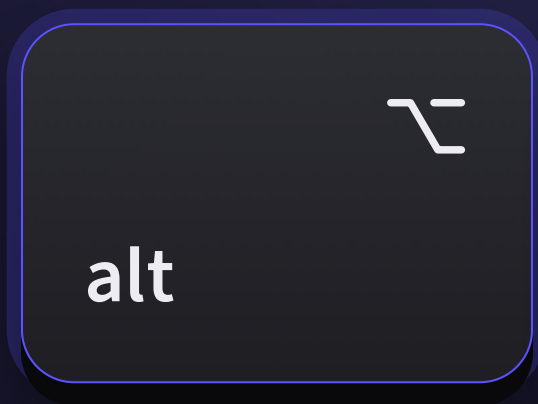

MAJOR

the brief changed

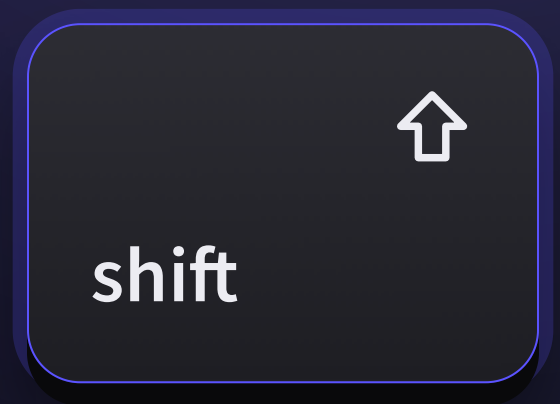

Three shapes.
That's the whole system.

the next version

an alternative

a major version

In VersionUp.
