 Brand\_Film\_v04.prproj

 Brand\_Film\_v03.prproj

 Brand\_Film\_v02.prproj

opened

# You opened v02. v04 was right there.

An afternoon of edits, in the wrong project.

Recent

sorted by last opened

 Brand\_Film\_v02.prproj

 Brand\_Film\_v04.prproj

 Brand\_Film\_v03.prproj

It happens the same way every time.

The old one was the last one you opened, so it sits at the top of the list.

Project: Brand\_Film\_v02

no warning

 Brand\_Film\_v02

 Archive

# Premiere opens it without a word.

Nothing says a newer version is sitting in the same  
folder.

# 16:40

Two days later

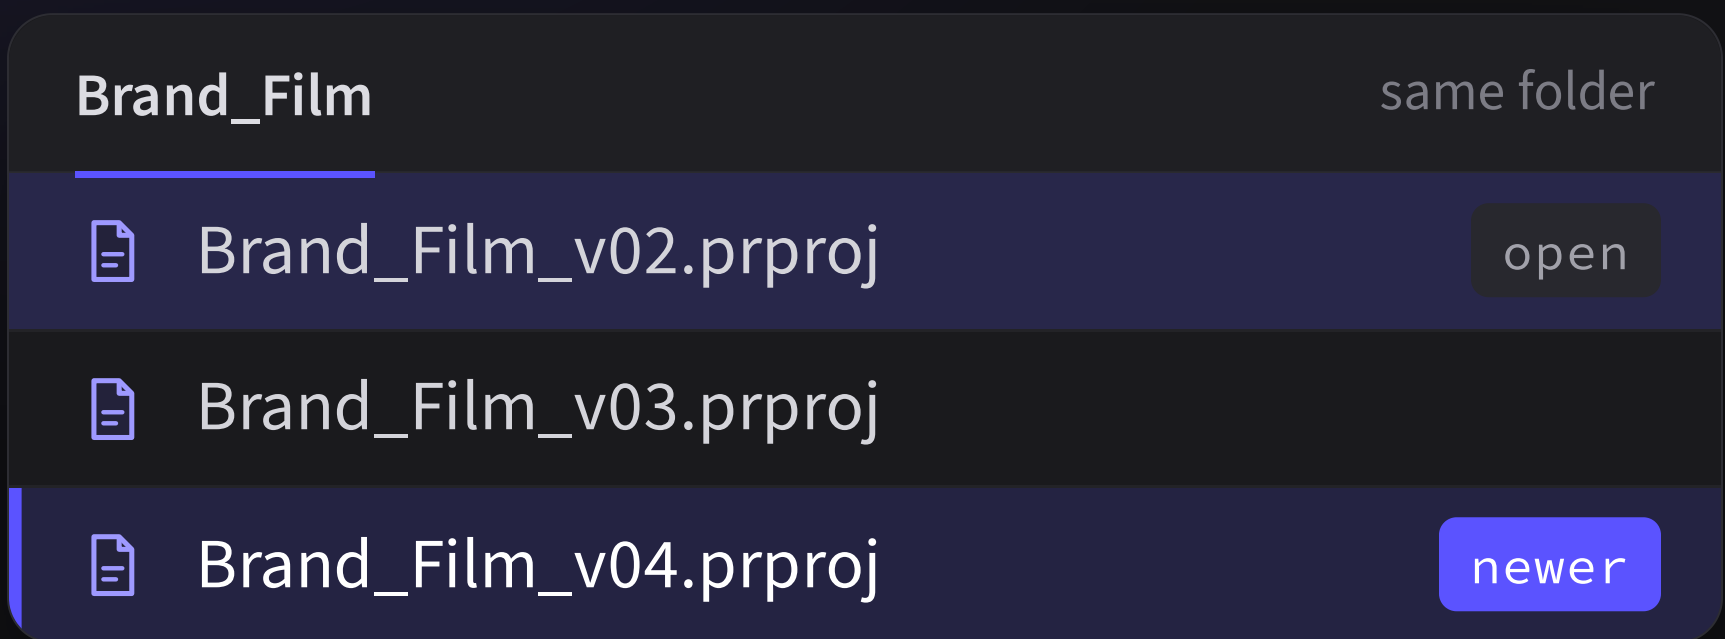

**Producer**

now

Did the new music make it in? Still hearing the old track

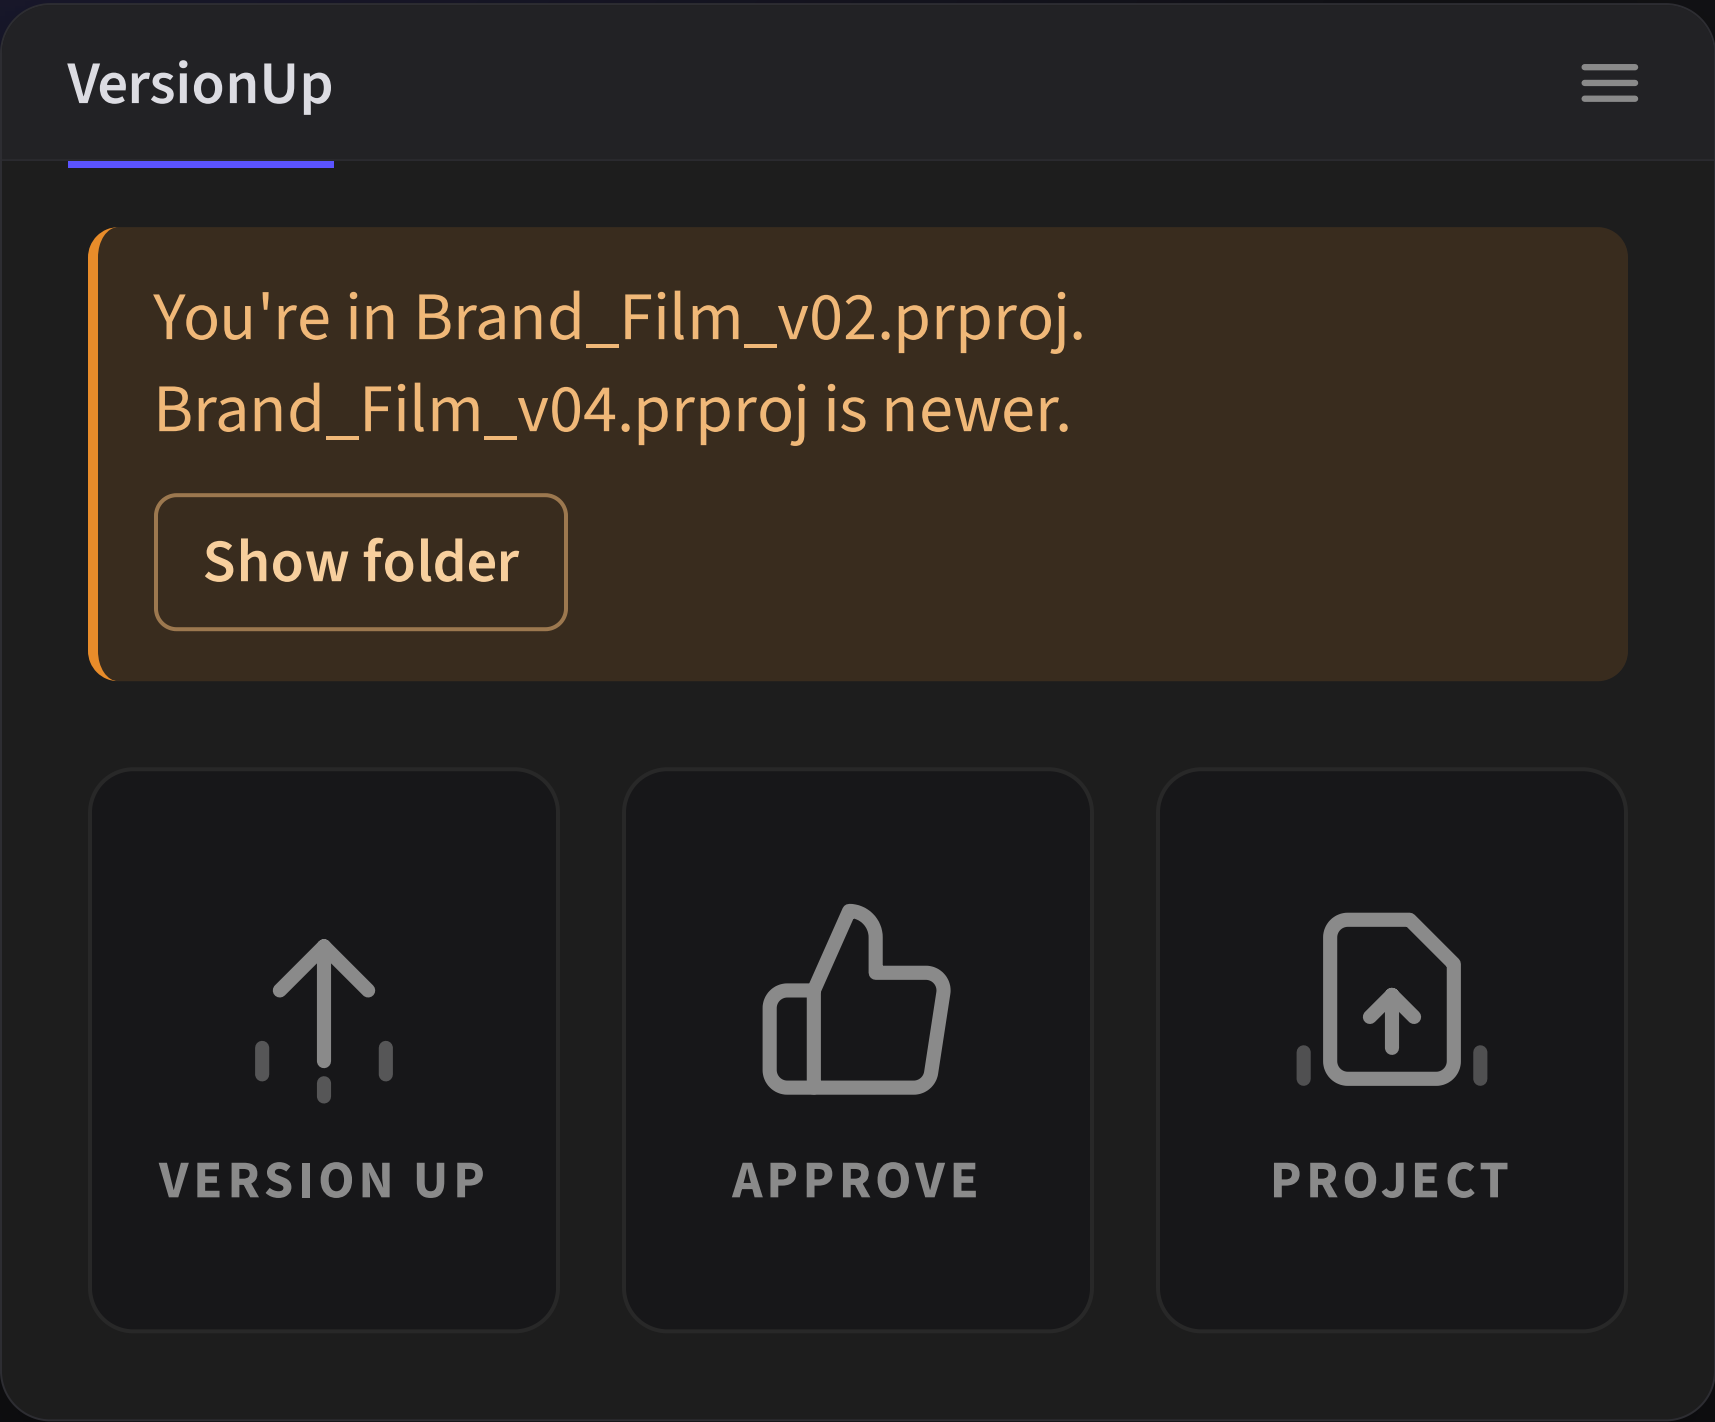

## You find out when someone asks where the changes went.

Usually after you've exported.

# VersionUp checks the folder the moment a project opens.

Looking for the newer versions it would have made itself.

And tells you, before  
you touch anything.

Even with no sequence open.

Brand\_Film

folder opened

Brand\_Film\_v02.prproj

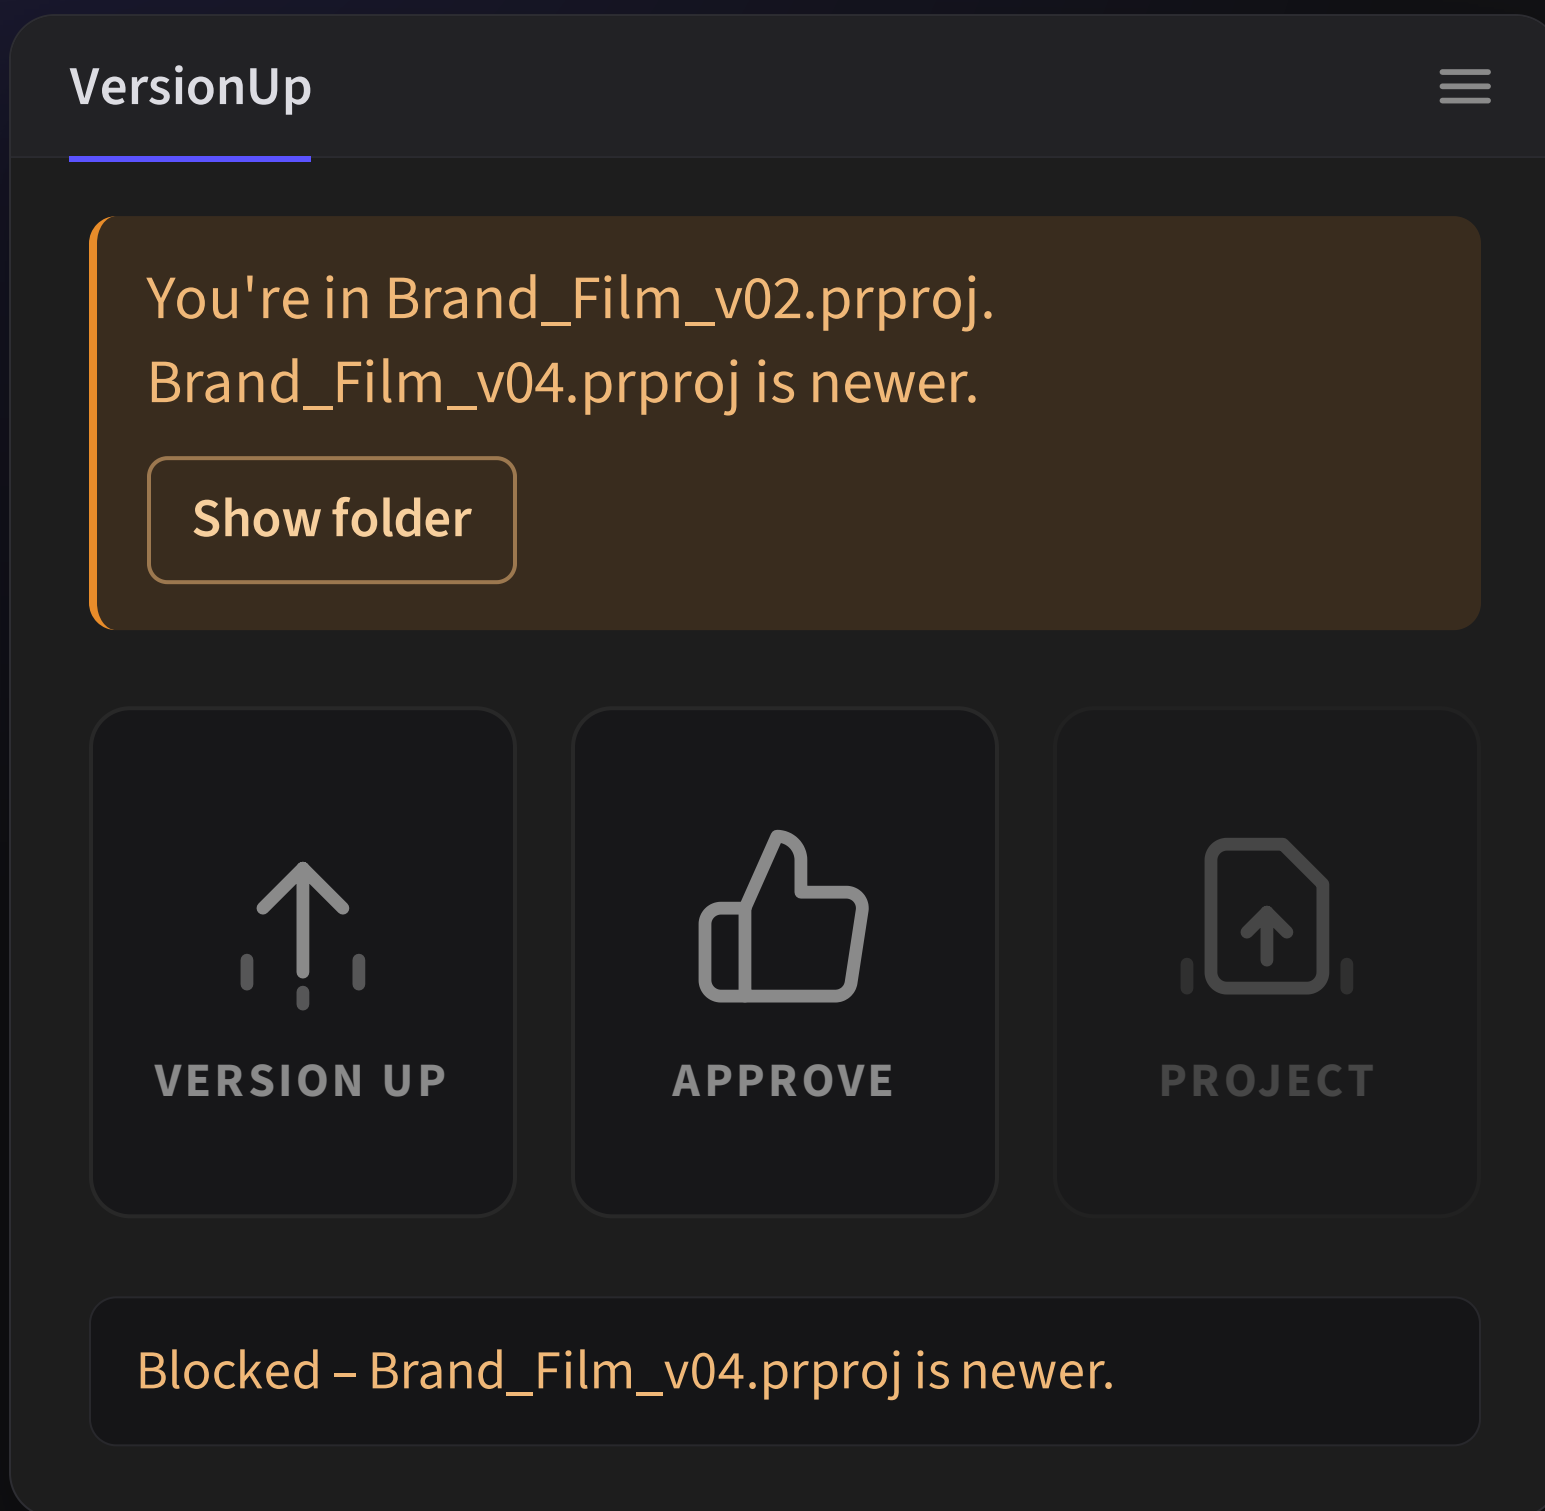

Brand\_Film\_v03.prproj

Brand\_Film\_v04.prproj

path copied

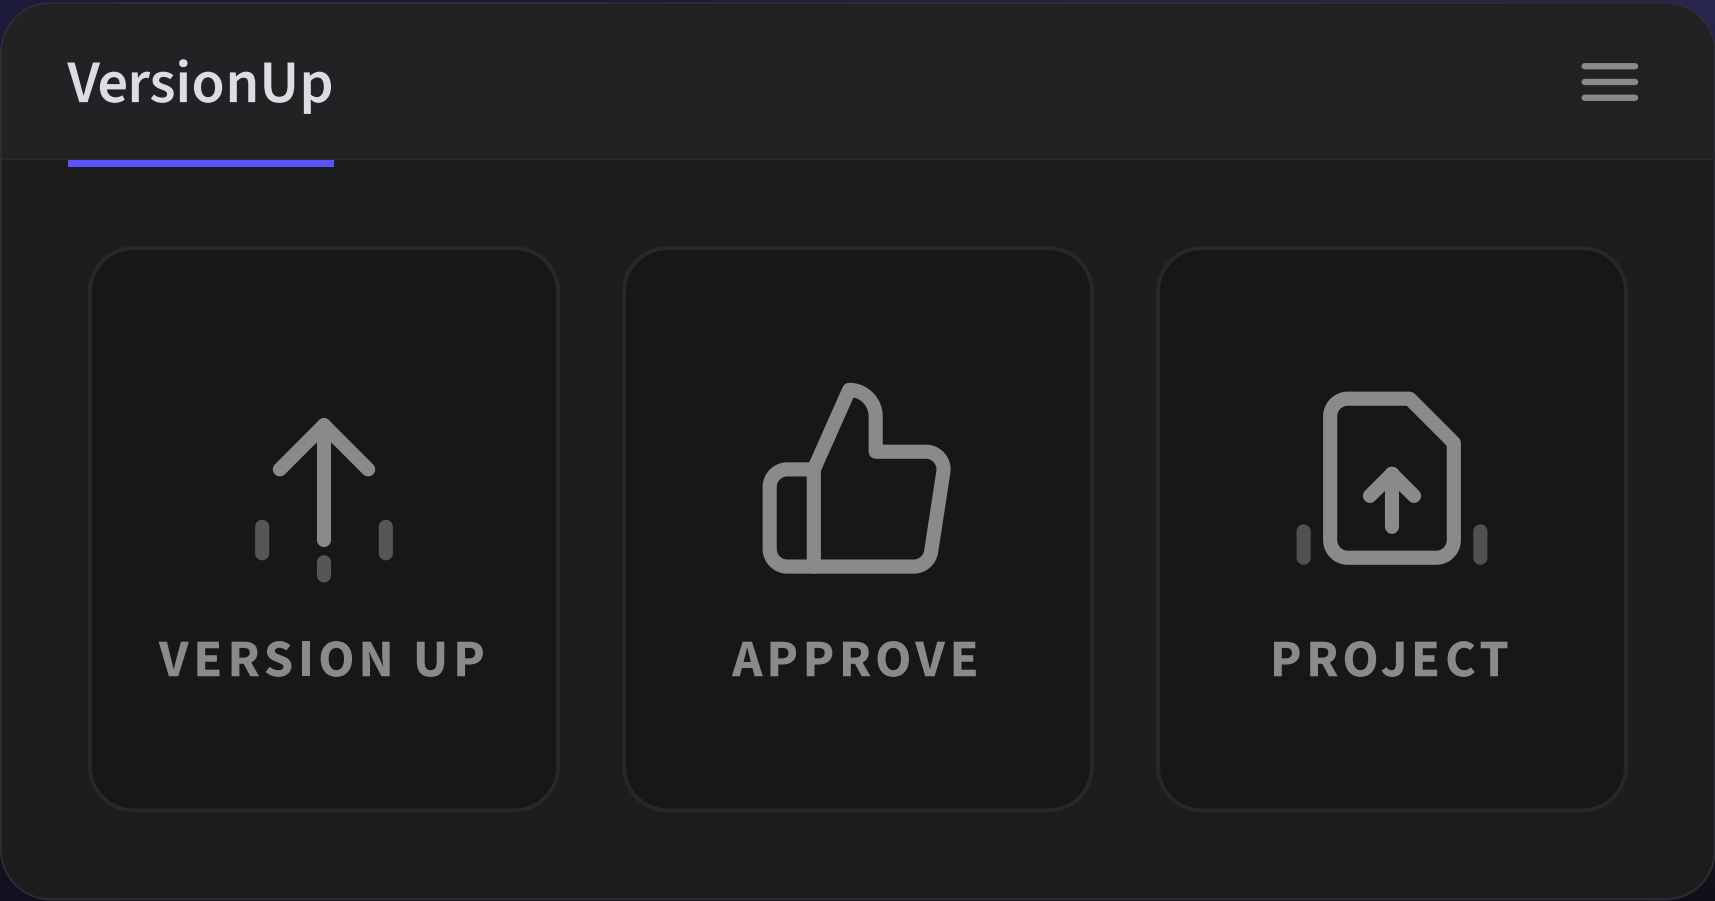

# Show folder takes you straight to it.

The newer file's full path is already on your clipboard.

# And it won't save a v03 behind your real v04.

The guard is on by default. Switch it off in Settings if you ever need to.

Always the version  
you meant.
